

Note 1. The Cart file is a duplicate of the checkout file, there was no Cart. Please re-send Cart. Cart is one long page

Note 2. Checkout (is one word) is one long page, the shipping is the continuation of the checkout page.

Checkout

1. The header of this page needs to be clean in order for the Customer to focus on order and payment method, we do not want to distract them here, so in the header just add the logo with the slogan on the upper left corner of the page. The word **Checkout** (1 item) in the same header in the center and all the way to the right corner add a larger Lock icon representing safe and secure. When they click on it, takes them to Privacy page. If they click on the 1 item a panel opens up with options. See attached
2. Add the button that we send you with the (lock icon confirm and pay) larger It will be in yellow with black writing, on top of the Order Summary The entire column under (Order Summary) needs to be shifted to the left more so it becomes wider that way Order Summary will be in one line, and all the writings under it becomes one line also, it will be cleaner and easier on the eye to follow. Draw a thin separation column line to distinguish this column from the credit card section. Move the 2 (Change) to the left more so it becomes more part of the credit card & shipping address. All the pricing in black color on top section. At the bottom

Order total: **\$896.25** like this, then after ☒ I read and add the button that we send you with the (lock icon confirm and pay) larger It will be in yellow with black writing

3. In the coupon section make the icon in red with white writing since we are moving the column to the left and making it wider the (apply) button in orange with white writing will move up to the same line as the Code button (write Code in the rectangular button)

Select Shipping Service

1. This is continuation and is part of the Checkout page after item 3. in the Checkout page, does not need a header
2. Add (apply) button in orange with white writing in the next line after (Add delivery instructions) but more in the center, once they click it all their request in the shipping will apply
2. Change **Order total:** **\$896.25** like this with one more space to the above line
3. Change (lock icon confirm and pay) larger It will be in yellow with black writing
4. Change (Continue Shopping) to white writing a little bit bigger size
5. The 2 green check marks does not need to be in the check box just by themselves.
6. The 1st line make the word **Exceptions** linkable, when they scroll on it a panel open with content explaining the Exceptions
7. The 2nd line make the word **Specified** linkable, when they scroll on it a panel open with content explaining the Specified
